Assistant Professor,
Center for Computational and Integrative Biology (CCIB) &
Center for Immunology and Inflammatory Diseases (CIID)

The Center for Computational and Integrative Biology and the Center for Immunology and Inflammatory Diseases at the Massachusetts General Hospital invite outstanding scientists or physician-scientists for a tenure-track faculty position as Assistant Professor at Harvard Medical School.

The goal of the Center for Computational and Integrative Biology is to foster interdisciplinary and quantitative research that answers enduring biological questions and provides insights into human disease. Research at the Center for Immunology and Inflammatory Diseases focuses on understanding the immune system and the inflammatory process, and how these contribute to the origin and development of a wide range of diseases. Members of both Centers have access to world-class research facilities located within Massachusetts General Brigham, Harvard Medical School and the Broad Institute, and to a large research data and sample biorepository of consented patients at the hospitals. We are particularly interested in candidates who are pursuing innovative approaches to fundamental problems in immunology. Successful candidates will be offered a competitive startup package to build an independent research program and will engage in teaching students and fellows in the laboratory and/or classroom.

Appointment as an Assistant Professor at Harvard Medical School will be commensurate with experience, training, and achievements in addition to teaching activities. Suitable candidates will hold a PhD, MD-PhD, or MD degree.

Interested candidates should send their cover letter, current curriculum vitae, and proposed research plan to facultysearch@ccib.mgh.harvard.edu. Candidates are responsible for having three letters of recommendation sent directly by three referees. Complete application packages will be accepted through December 15, 2023.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
